Agilities are combinations of your work skills and interests. Use them to work more effectively in your career. People with the talent for operating objects are uniquely gifted when working with machines, tools, and equipment. They are able to work faster and more effectively in their careers because they work well with their hands and think logically. They can repair and service complex equipment and devices and utilize various technologies in the process. They can be skilled at manual labor that requires physical strength, dexterity, or both.
